

POWER HOOK

Benefits

Maximum payload and increased power to weight ratio is achieved using the lightweight Power Hook system

Fast lift facility reduces lift cycle by 33%, increasing productivity

The new improved Power Hook utilises fewer moving components minimising downtime and delivering the Edbro "fit & forget" promise

Features

High strength steel for optimum durability and lightweight construction

Fully interlocked system to prevent misuse or out of sequence operation

In-cab warning system for maximised operator safety

Large rear rollers to ensure safe and accurate bin guiding

Unique secure hook profile prevents bin dismount during operation

Model code	TH23
Maximum GVW (tonne)	32
Maximum lift capacity (tonne)	23
Equipment weight (kg)	2980
Maximum body length (m)	6.8
Tipping angle (°)	46

Detailed specification sheets are available on request or to download at www.edbro.com.

Edbro Extras

An extensive selection of high performance accessories is available to compliment the complete range of Edbro waste handling equipment and further optimise your safety and productivity in operation.

Please contact Edbro for further details of the catalogue of options available and full pricing information.
